
BOTH OF THESE FITTINGS ARE TIGHT.
THE COLLAR (TOWARD TOP OF PAGE) APPEARS TO BE PART OF THE TUBE ASSEMBLY. THIS PART OF THE ASSEMBLY CAN BE EASILY ROTATED WITHIN THE TWO FITTINGS CONNECTING IT TO THE POWER STEERING PUMP. THERE IS ALSO A LOT OF FREE PLAY BETWEEN THIS ASSEMBLY AND THE TWO FITTINGS. THE TUBE CAN BE DEFLECTED 5 - 10 DEGREES WITH JUST LIGHT PRESSURE TO THE TUBE.
