

Red - This is your "park power" for the motor (to the motor)
Orange/White - This is your +12v input from the panel for the motor
Green/Black - This is your Washer Motor feed (to the washer pump)
Black - This is the +12v input from the panel for the Washer
Blue - This is your High Speed setting for the motor (to the motor)
Black - This is a ground line that is in use when the motor is off.
White - This is your Low Speed setting for the motor (to the motor)

The Orange/White and Black inputs I fed directly off of the single input from the RF kit.
